Move From Boomi to SAP Integration Suite

Migration Assessment Report

Date of Report: 27-06-2025

Contents

Introduction

By introducing the SAP Business Technology Platform (BTP), the integration topic has moved to a new stage. Certainly, there is an infrastructure change running cloud-based services and solutions. This means that administration and operational tasks may differ. The innovative technology also impacts the SAP Integration Suite design and runtime. Nested as a service on SAP BTP, SAP Integration Suite runs in SAP BTP, Cloud Foundry environment. This foundation is an open-source platform as a service (PaaS). It is designed to be configured, deployed, managed, scaled, and upgraded on any cloud Infrastructure as a Service (IaaS) provider. Please be aware of what features the Cloud Foundry environment on SAP BTP supports and doesn't support. However, the intention of SAP Integration Suite is to connect and automate processes and data efficiently across the heterogeneous IT landscape and business network by providing comprehensive integration capabilities and best practices to accelerate and modernize integration.

Migration Assessment

Assessment Categories

• **Ready to migrate:** These Boomi processes match to the SAP Integration Suite. They can be moved manually to the SAP Integration Suite. The move might include additional steps within SAP Integration Suite to configure this scenario properly.
• **Adjustment required:** These Boomi processes partially match to the scenarios offered in SAP Integration Suite. They can be moved to SAP Integration Suite manually. Further adjustments to the end-to-end integration process based on best practices are required.
• **Evaluation required:** For these Boomi processes, some items require further evaluation before the scenario can be moved to SAP Integration Suite.

Scenario Categorization Summary:

Category	Count	Percentage
Migrate	0	0.00%
Adapt	2	100.00%
Evaluate	0	0.00%
Total Processes	Main Processes	Sub-Processes
2	2	0

Based on our migration assessment:
• 0.00% of the Boomi processes reviewed from your current Boomi Account can be moved manually to the SAP Integration Suite.
• 100.00% of the Boomi processes reviewed from your current Boomi Account can be moved manually with some adjustments.
• 0.00% of the interfaces should be further analyzed and re-evaluated prior to the move to SAP Integration Suite.

Adapter/Connector/Shape Type Summary:

Type	Count	Alternative
start	2	start
connectoraction	2	NA
map	1	messageMapping
stop	1	end
decision	1	router
processcall	2	processCall

Thank you!
